Introducing Digital day with Pepper in schools

With the Digital Day, Robot Pepper lets students look up from their books and right in the eyes of digitalization.

MUNICH (Bavaria) - 20.12.2019 - City of Munich; today a group of Business Administration students announced together with the City of Munich the project "Digital Day with Pepper" in schools, a day to bring digitalization closer to pupils and improve their motivation in school. On this day Pepper visits a school to spend two lessons per class to present itself and the topic around digitalization and robotics to pupils in the age of 12-13. This will happen through different games and presentations, which helps to generate diversity to the everyday school life and improves the motivation for those topics.

Press Release

“We are pleased that Pepper is not only used informatively, but also actively for educational purposes. In the age of digitalization, we see a great added value in motivating students to learn with Pepper and introducing them to the digital world.”, said Mr. Schmidt, responsible for the Innovation Lab of the City of Munich.

"School was so much more fun today" and "Hopefully Pepper is coming again" students said after Digital Day at their school.

After the presentation of the concept "Digital Day in Schools" possible schools will be contacted. With the schools, which are interested in a "Digital Day" dates for the implementation are agreed upon.

So let's go to our website and checkout the concept of “The Digital Day with Pepper”.
